Scholar Profile

PhD in Mechanical Engineering, *Princeton University* — Fall 2017 — Spring 2023 (Expected)
MSE in Robotics, *University of Pennsylvania* — Fall 2016 — Summer 2017
BSE in Electrical Engineering, *University of Pennsylvania* — Fall 2012 — Spring 2016

Employment

Assistantship in Research — **2017 — Present**
Princeton University — *Princeton, NJ*

- Advised by Anirudha Majumdar in the Intelligent Robot Motion (IRoM) Lab.
- Developed **new theory and algorithms** to understand and exploit **task-relevant information** in **decision-making and robotics problems** — e.g., how much task-relevant information is necessary for a robot to do its job well and trade-offs between performant and robust decision making under uncertainty about task-relevant variables.
- Research synthesized methodologies from different fields, such as, control theory, information theory, machine learning, and statistical mechanics.

Assistantship in Instructor: Introduction to Robotics (MAE345 / MAE549) — **2019 — 2020**
Princeton University — *Princeton, NJ*

- Received the **Crocco Award for Teaching Excellence** for my performance as an instructor.
- Helped redesign the course curriculum from scratch.
- Created programming assignments (C and Python) introducing students to fundamental robotics algorithms.
- Designed and prototyped the course hardware project in which students create a camera-based obstacle avoidance system implemented on a quadrotor platform.
- Gave course lectures when main instructor was traveling.

Engineering Intern — **Summer 2016**
Exyn Technologies — *Philadelphia, PA*

- Created efficient implementations of SLAM algorithms (in C++) for mapping spaces via an autonomous quadcopter equipped with depth cameras.
- Integrated said algorithms into existing software infrastructure and designed physical experiments to validate the correctness of said algorithms.

Research Intern, Safety-Critical Avionics — **Summer 2015**
NASA Langley Research Center — *Langley, VA*

- Assisted in modifying quadcopter autopilot firmware (C++) for experiments conducted by branch members.
- Created efficient software module (C++) for efficient state estimation and robust mission planning for unmanned aerial vehicles.

Skills

Programming Languages / Tools	Python, C, C++, SQL, Git, LaTeX, Scientific Libraries (e.g., NumPy, PyTorch, JAX)
Analytical Modeling	Mathematical Optimization, Control Theory, Statistics / Machine Learning, Information Theory

Selected Publications

Fundamental Performance Limits for Sensor-Based Robot Control and Policy Learning — 2022
A. Majumdar and V. Pacelli. In the *Proceedings of Robotics: Systems and Science*.

Robust Control Under Uncertainty via Bounded Rationality and Differential Privacy — 2022
V. Pacelli and A. Majumdar. In the *Proceedings of the IEEE Intl. Conf. on Robotics and Automation*.

Invariant Policy Optimization: Towards Stronger Generalization in Reinforcement Learning — 2021
A. Sonar, V. Pacelli, and A. Majumdar. In the *Proceedings of Learning for Dynamics and Control Conf*.

Learning Task-Driven Control Policies via Information Bottlenecks — 2020
V. Pacelli, and A. Majumdar. In the *Proceedings of Robotics: Systems and Science*.

Task-Driven Estimation and Control via Information Bottlenecks — 2019
V. Pacelli and A. Majumdar. In the *Proceedings of the IEEE Intl. Conf. on Robotics and Automation*.

Integration of Local Geometry and Metric Information in Sampling-Based Motion Planning — 2018
V. Pacelli, O. Arslan, and D. E. Koditschek. In the *Proceedings of the IEEE Intl. Conf. on Robotics and Automation*.

Sensory Steering for Sampling-Based Motion Planning — 2017
O. Arslan, V. Pacelli, and D. E. Koditschek. In the *Proceedings of the IEEE Intl. Conf. on Intelligent Robots and Systems*.
