EDUCATION

Princeton University, Princeton, NJ 2017 — Now

Doctoral Candidate, Mechanical and Aerospace Engineering

Advisor: [Anirudha Majumdar](#)

Expecting to Graduate in May, 2023

University of Pennsylvania, Philadelphia, PA 2016 — 2017

Master's of Science in Engineering, Robotics

Advisor: [Daniel E. Koditschek](#)

University of Pennsylvania, Philadelphia, PA 2012 — 2016

Bachelor's of Science in Engineering, Electrical Engineering, *Cum Laude*

RELEVANT EXPERIENCE

PRINCETON UNIVERSITY

📍 Princeton, NJ

ASST. IN RESEARCH

📅 September 2017 — Now

The focus of my research, conducted as part of Princeton's [Intelligent Robot Motion \(IRoM\) Lab](#) under [Anirudha Majumdar](#), is on understanding the role that **task-relevant information** plays in designing performant robots and other decision-making systems. Two particular topics I studied are the benefits of only depending on a necessary amounts of information to achieve performance — leading to **robustness to measurement error** — and characterizing the **fundamental performance limits** of a robot equipped with a specific sensor. These projects involved developing new theory and algorithms that combine methodologies from many fields including, **control theory, information theory, machine learning, and statistical mechanics**.

PRINCETON UNIVERSITY

📍 Princeton, NJ

ASST. IN INSTRUCTION

📅 September 2019 — January 2021

I aided in redesigning the curriculum for Princeton's [Introduction to Robotics](#) course (MAE 345 / 545). In addition to giving feedback on the course content, I designed most of the programming assignments (C and Python) which introduce students to various algorithms central to the field of robotics — including a final project in which students create a camera-based obstacle avoidance system implemented on a quadrotor hardware platform. I also filled in as lecturer when the instructor needed. I received the **Crocco Award for Teaching Excellence** for my work on the course.

PRINCETON UNIVERSITY

📍 Princeton, NJ

STUDENT INSTRUCTOR, AI4ALL

📅 Summer 2018

I worked as a student instructor in [Princeton's AI4ALL program](#), which introduces high school students in underrepresented demographics to artificial intelligence and machine learning through hands-on projects. My responsibilities involved giving introductory lectures on machine learning algorithms as well as designing and advising projects for students interested in cybersecurity applications.

As an intern, I worked on efficient implementations of SLAM algorithms for mapping spaces via an autonomous quadcopter equipped with depth-sensitive cameras. I integrated said algorithms into the project's existing software infrastructure and I designed physical experiments to validate the correctness of said algorithms.

NASA LANGLEY RESEARCH CENTER

 Hampton, VA

RESEARCH INTERN

 Summer 2015

I assisted in modifying quadcopter autopilot firmware for experiments conducted by branch members. I also created software module for efficient state estimation and fault-tolerant mission planning for unmanned aerial vehicles.

AWARDS

- Crocco Award for Teaching Excellence**  September 2020
 Prize awarded by the faculty of the Department of Mechanical and Aerospace Engineering in recognition of outstanding performance as an Assistant in Instruction.
- IEEE RAS Travel Grant (ICRA 2018)**  March 2018
 To aid in funding expenses incurred while traveling to present at the conference.
- Hon. Harold Berger Award**  May 2016
 Given to the senior design team in the Department of Electrical and Systems Engineering whose outstanding senior design project combines conceptual or technical innovation with entrepreneurial possibility.

PUBLICATIONS

- Fundamental Performance Limits for Sensor-Based Robot Control and Policy Learning** 2022
 A. Majumdar and V. Pacelli. In the *Proceedings of Robotics: Systems and Science*.
- Systems of Stacking Interlocking Blocks** 2022
