VINCENT PACELLI
DOCTORAL CANDIDATE

✉ vpacelli@princeton.edu ☎ (973)-461-3877 🔗 http://pacel.li 🎓 Google Scholar

EDUCATION

Princeton University, Princeton, NJ — 2017 — Now
Doctoral Candidate, Mechanical and Aerospace Engineering
Advisor: Anirudha Majumdar
Expecting to Graduate in May, 2023

University of Pennsylvania, Philadelphia, PA — 2016 — 2017
Master's of Science in Engineering, Robotics
Advisor: Daniel E. Koditschek

University of Pennsylvania, Philadelphia, PA — 2012 — 2016
Bachelor's of Science in Engineering, Electrical Engineering, *Cum Laude*

RELEVANT EXPERIENCE

PRINCETON UNIVERSITY — ASST. IN RESEARCH
📍 Princeton, NJ 📅 September 2017 — Now

The focus of my research, conducted as part of Princeton's Intelligent Robot Motion (IRoM) Lab under **Anirudha Majumdar**, is on understanding the role that **task-relevant information** plays in designing performant robots and other decision-making systems. Two particular topics I studied are the benefits of only depending on a necessary amounts of information to achieve performance — leading to **robustness to measurement error** — and characterizing the **fundamental performance limits** of a robot equipped with a specific sensor. These projects involved developing new theory and algorithms that combine methodologies from many fields including, **control theory, information theory, machine learning, and statistical mechanics**.

PRINCETON UNIVERSITY — ASST. IN INSTRUCTION
📍 Princeton, NJ 📅 September 2019 — January 2021

I aided in redesigning the curriculum for Princeton's Introduction to Robotics course (MAE 345 / 545). In addition to giving feedback on the course content, I designed most of the programming assignments (C and Python) which introduce students to various algorithms central to the field of robotics — including a final project in which students create a camera-based obstacle avoidance system implemented on a quadrotor hardware platform. I also filled in as lecturer when the instructor needed. I received the **Crocco Award for Teaching Excellence** for my work on the course.

PRINCETON UNIVERSITY — STUDENT INSTRUCTOR, AI4ALL
📍 Princeton, NJ 📅 Summer 2018

I worked as a student instructor in Princeton's AI4ALL program, which introduces high school students in underrepresented demographics to artificial intelligence and machine learning through hands-on projects. My responsibilities involved giving introductory lectures on machine learning algorithms as well as designing and advising projects for students interested in cybersecurity applications.

EXYN TECHNOLOGIES   ENGINEERING INTERN
📍 Philadelphia, PA   📅 Summer 2016

As an intern, I worked on efficient implementations of SLAM algorithms for mapping spaces via an autonomous quadcopter equipped with depth-sensitive cameras. I integrated said algorithms into the project's existing software infrastructure and I designed physical experiments to validate the correctness of said algorithms.

NASA LANGLEY RESEARCH CENTER   RESEARCH INTERN
📍 Hampton, VA   📅 Summer 2015

I assisted in modifying quadcopter autopilot firmware for experiments conducted by branch members. I also created software module for efficient state estimation and fault-tolerant mission planning for unmanned aerial vehicles.

AWARDS

- **Crocco Award for Teaching Excellence**   📅 September 2020
  Prize awarded by the faculty of the Department of Mechanical and Aerospace Engineering in recognition of outstanding performance as an Assistant in Instruction.

- **IEEE RAS Travel Grant (ICRA 2018)**   📅 March 2018
  To aid in funding expenses incurred while traveling to present at the conference.

- **Hon. Harold Berger Award**   📅 May 2016
  Given to the senior design team in the Department of Electrical and Systems Engineering whose outstanding senior design project combines conceptual or technical innovation with entrepreneurial possibility.
